

# THEPAX

**IPC**<sup>®</sup>  
INTERPHARMA

dox-a | Nutri

# What is it

Complementary feed for all species based on inactivated and stabilized cells of *Saccharomyces Cerevisiae*

## ◆ Compatibility

**THEPAX** powder is compatible with all feed additives, without interacting with any enzymatic component normally present.

**THEPAX** is naturally resistant to high temperature (20 minutes at 120°C), to pH changes (no negative effects even at pH of 2), and to antibiotics, so suitable to be added to any kind of finished feed, even in pellet form.

**THEPAX** liquid is a suspension of intact yeast cells and therefore it shouldn't be used in drinking water systems, since it may block or stop pipes and nipples. Dilute it properly in a small 20 L tank and use it directly.

# THEPAX

## Indications and further information

**THEPAX** : is a suitable prebiotic to be used in livestock to help meeting specific nutritional requirements that occur in animals during their physiological productive conditions.

**In ruminants THEPAX** : contributes to increase the number of digestive microflora in order to help the animal to utilize the feed, thanks to a demonstrated increase of VFA production. Nutritional benefits are

- Release of nutrients content to micro flora
- Increase number of digestive bacteria population
- Keep stable rumen pH fluctuations
- Improve FCR
- Increase animal performances
- Decrease production unit cost.

**In monogastrics THEPAX** : helps large intestine micro flora to limit the growth of pathogenic bacteria, both by direct and indirect effects, leading to

- Reduced incidence of abnormal fermentations with reduction in toxin production
- Rapid recovery of digestive micro flora following antibiotic treatments
- Improve resistance to stress
- Improvement in performances, by increasing feed intake and FCR
- Improvement in the animals overall health and condition.

### ◆ THEPAX Dosages:

Dox-al nutritionists and animal specialists are available with reliable service, product knowledge and after sale customer oriented support in day-to-day challenges, helping to choose the right dosage.

### ◆ Instructions and precautions for use

Store in a cool and dry warehouse.

Avoid any direct light and heat sources.

Close bags after use.

Keep out of reach of children.

Do not eat, drink or smoke during handling.

### ◆ Packaging

25 kg Nutri bag.

Grey/Green color aspect.

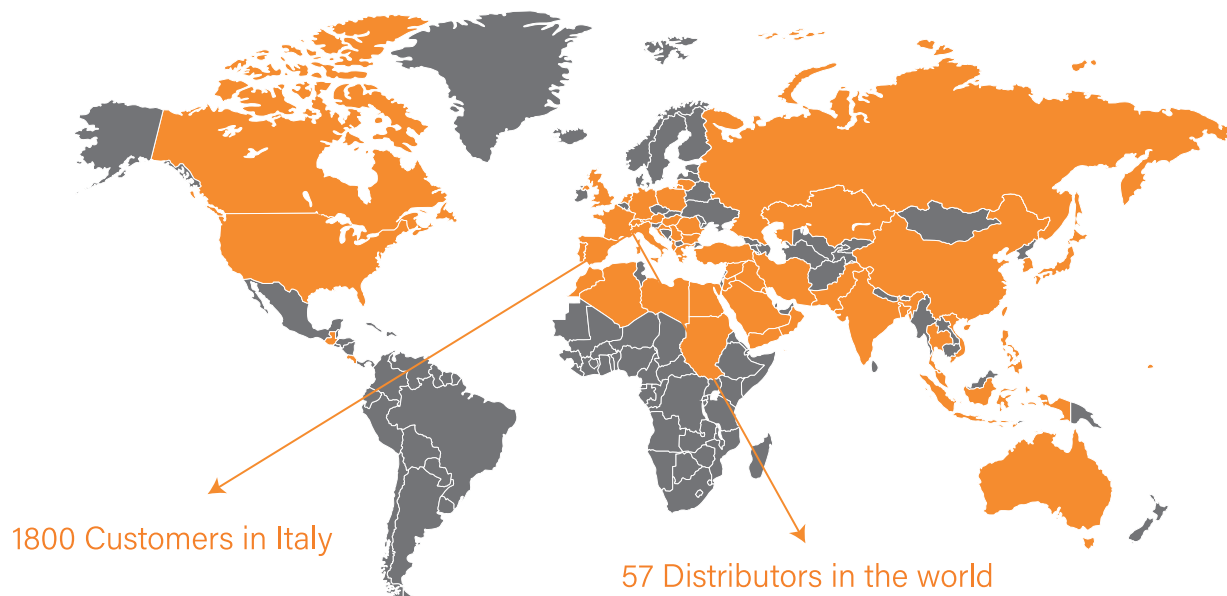

1 L bottle

Rev.00 23/03/2015

## DOXAL WORLDWIDE

Doxal is actively selling into more than 45 countries
